## The whole FlagShip 7 manual consist of following sections:

| <b>Section</b> | <b>Content</b>   | <b>Pages</b> |
|----------------|--|--------------|
| <b>GEN</b>     | General information: License agreement & warranty, installation and de-installation, registration and support                      | 18           |
| <b>LNG</b>     | FlagShip language: Specification, database, files, language elements, multiuser, multitasking, FlagShip extensions and differences | 176          |
| <b>FSC</b>     | Compiler & Tools: Compiling, linking, libraries, make, run-time requirements, debugging, tools and utilities                       | 90           |
| <b>CMD</b>     | Commands and statements: Alphabetical reference of FlagShip commands, declarators and statements                                   | 486          |
| <b>FUN</b>     | Standard functions: Alphabetical reference of FlagShip functions   | 640          |
| <b>OBJ</b>     | Objects and classes: Standard classes for Get, Tbrowse, Error, Application, GUI, as well as other standard classes                 | 368          |
| <b>RDD</b>     | Replaceable Database Drivers   | 38           |
| <b>EXT</b>     | C-API: FlagShip connection to the C language, Extend C System, Inline C programs, Open C API, Modifying the intermediate C code    | 160          |
| <b>FS2</b>     | Alphabetical reference of FS2 Toolbox functions  | 376          |
| <b>QRF</b>     | Quick reference: Overview of commands, functions and environment   | 40           |
| <b>PRE</b>     | Preprocessor, includes, directives   | 30           |
| <b>SYS</b>     | System info, porting: System differences to DOS, porting hints, data transfer, terminals and mapping, distributable files          | 42           |
| <b>REL</b>     | Release notes: Operating system dependent information, predefined terminals  | 8            |
| <b>APP</b>     | Appendix: Inkey values, control keys, ASCII-ISO table, error codes, dBase and FoxPro notes, forms                                  | 34           |
| <b>IDX</b>     | Index of all sections  | 42           |
| <b>fsman</b>   | The on-line manual contains all above sections, search function, and additionally last changes and extensions                      | variable     |
